LIUDMYLA KARMELIUK

FULLSTACK DEVELOPER

Portfolio | GitHub

SUMMARY

Fullstack Developer with hands-on experience building responsive web applications and a commercial website for a real client. Skilled in HTML5, CSS3, JavaScript, TypeScript, React, Next.js, and REST APIs, with experience integrating email delivery through Resend and Telegram bot notifications. Familiar with Node.js, Express.js, MongoDB, Firebase, TanStack Query, Axios, and Zustand. Focused on clean, maintainable code, accessible user-friendly interfaces, and practical solutions that meet business needs.

PROJECTS

Теплий дотик, GitHub Repository [Next.js, React, TypeScript, CSS Modules, Resend, Telegram Bot API, REST API, Vercel]
Developed a responsive commercial website for a stove and fireplace craftsman. Implemented a contact/order form with email delivery through Resend and Telegram bot notifications, helping the client receive customer inquiries conveniently.

Role: Fullstack Developer **Individual commercial project**

Nanny.Services, GitHub Repository [HTML5, CSS3, JS, TypeScript, React, Firebase (Authentication, Database), React Hook Form, Yup, React Hot Toast, React Router DOM, Vite, Versel]
Developed a Single Page Application (SPA) for finding and booking babysitters. Implemented user authentication and data storage using Firebase. Built features for browsing and filtering nannies, managing favorites for authorized users, and scheduling appointments. Designed a responsive and user-friendly interface.

Role: Frontend Developer **Individual project**

TravelTrucks, GitHub Repository [HTML5, CSS3, JS, TypeScript, React, Next.js, TanStack Query, MockAPI, Formik, Yup, React Hot Toast, React Datepicker, Versel]
TravelTrucks — a frontend web application for camper rental featuring a catalog, filtering, pagination, and detailed camper pages with the ability to view reviews. It also includes favorites management, booking functionality, and a user-friendly interface.

Role: Frontend Developer **Individual project**

ToolNext, GitHub Repository(backend) GitHub Repository(frontend) [HTML5, CSS3, JS, TypeScript, React, Next.js, Node.js, Express.js, MongoDB, Versel, Render]
ToolNext — a full-stack tool rental platform where users can both rent out and book tools. Features include authentication, bookings, reviews, filtering, and pagination.

Role: Fullstack Developer responsible for the endpoint: Creation a New Tool(backend) and Registration Page(frontend) **Team project**

NoteHub, GitHub Repository [Next.js, React, JS, HTML5, CSS3, Vite, GitHub, Vercel]
NoteHub is a simple and efficient application designed for managing personal notes. It helps keep your thoughts organized and accessible in one place, whether you are at home or on the go.

Role: Frontend Developer **Individual project**

Меблерія, GitHub Repository [HTML5, CSS3, JS, Vite, Git, Trello, Axios, Accordion, Swiper, Izitoast]
A modern, responsive website for a company specializing in furniture sales. The site features product listings, promotional sections, and a user-friendly interface with pagination.

Role: Frontend Developer responsible for the Header **Team project**

WebStudio, GitHub Repository [HTML5, CSS3, JavaScript]
A website of WebStudio company. Responsive/Adaptive design, transform effects, modal window.

Role: Frontend Developer **Individual project**

WatchCharm, GitHub Repository [HTML5, CSS3, JavaScript, Git/GitHub]
A website of online store with collection of premium watches. Responsive layout.

Role: Frontend Developer responsible for the Sales Section **Team project**

WORK EXPERIENCE

Freelance Web Developer

Self-employed | December 2025 – Present | Remote

- Develop responsive websites and web applications using React, Next.js, TypeScript, and modern frontend technologies.
- Build and integrate API routes and connect frontend interfaces with backend services.
- Use Git and GitHub for version control and deploy applications using Vercel and other hosting platforms.

Achievements: Developed Warm Touch, a commercial website for a real client, featuring a responsive portfolio gallery, lightbox, theme switching, and SEO optimization. Implemented a contact form with email notifications via Resend and automated order notifications through the Telegram Bot API.
